INTRODUCTION

Ellis Island was the flagship of federal immigration depots during the peak period of immigration to the United States in the late nineteenth and early twentieth centuries. Twelve million immigrants—many coming from parts of Southern and Eastern Europe and Asia that heretofore had sent few emigrants to the United States—passed through this New York harbor portal to America from its opening in 1892 to its closing in 1954.

To some newcomers who were interrogated and inspected on Ellis Island, it was the "Isle of Tears." There they had shivered in fear before the probing gaze of uniformed physicians of the U.S. Marine Hospital Service and answered with quivering lips the brusque questions of Immigration Bureau officers. Although the overwhelming majority of immigrants processed on Ellis Island were admitted, even they remembered, shuddering, the apprehensive faces of the detained and the utter dejection of those turned away at America's doorstep.

For others, Ellis Island was the "Isle of Hope." For them the high vaulted ceiling of the registry room, or Great Hall, with its polished Spanish tiles, marked the doorway to a new life of liberty and opportunity in a free land. Tears and hope, apprehensions and expectations were what Ellis Island evoked in the foreign-born.

But what did Ellis Island mean to those physicians and inspectors on the other side of the desk and to those politicians and government officials in far off Washington, D.C.? And of what significance is the Ellis Island experience to the larger social history of the American people and to the institutional history of American government? The Ellis Island story is far more complex and nuanced than a dramatic moment filled with the smiles and tears of anxious newcomers.

First, the processing of immigrants on Ellis Island is a significant chapter in the much larger saga of the peopling of America. The questions asked of newcomers and the reasons for detention and rejection reveal Americans' shifting considerations and concerns about immigration generally and certain categories of newcomers in particular—the sick, the weak, criminals, and political dissidents. Second, the medical inspection of newcomers marks an important moment in the history of medicine and public health. On Ellis Island, uniformed physicians of the U.S. Marine Hospital Service (later the U.S. Public Health Service) sought to exclude harmful germs and debilitating physical conditions by excluding the newcomers whose very bodies might present a health menace or, at the very least, a burden to Americans. Third, the regulations and procedures set in place on Ellis Island and at other immigration depots epitomize a larger transformation taking place during the Progressive era in the role that federal authority would play in shaping American society and culture. In that sense, Ellis Island was one of the laboratories where the modern administrative state was realized. Finally, Ellis Island was an arena of political conflict, where pro-immigration and anti-immigration forces clashed. In newspapers, magazines, and speeches on the floor of state legislatures and Congress, Ellis Island was cited as either an example of how immigration could be rationally managed for the nation's benefit or as a place where corruption

flourished, casting doubt on whether immigration and all connected to it could ever be anything more than an ominous stain on the nation's moral fabric.

These themes and others emerge from the documents on the eighteen reels of United States Immigration Bureau case files and correspondence in this collection. Researchers can follow the processing of immigrants entering the country through America's busiest port from 1906 to the period after the Johnson-Reed Immigration Act of 1924. Then, immigration restriction and significant administrative changes dramatically reduced the role that Ellis Island would play in the immigration experience.

Although Ellis Island would eventually become synonymous with immigration, its history long preceded the great waves of newcomers who would alter the course of American life. It was known to the Mohegan Indians as "Kilshk" or "Gull Island." When it was part of New Amsterdam, the Dutch called it "Oyster Island" because of the abundance of oysters in nearby waters. In the early 1700s, the island became known as "Gibbet Island" because the British had erected a gibbet or gallows on it for executing pirates. By 1757 it was occupied by a "pest house," as hospitals for contagious disease were called.

During the Revolutionary War the island passed into the hands of a New Jersey merchant-farmer, Samuel Ellis, whose name continues to identify the island. Ellis converted the pest house into a tavern for picnickers and fishermen. When Ellis died in 1794, the state of New York purchased the island from his heirs for \$10,000, and it was later sold to the federal government for use as a fort. However, once the federal government assumed responsibility from the states for the processing of immigrants in 1890, federal officials determined that the New York State immigration depot at Castle Garden, an old fortress at the tip of Manhattan, was inadequate to handle the heavy flow of new arrivals. Ellis Island became the site of the new federal facility.

The Ellis Island immigration depot cost \$500,000 to erect and opened January 1, 1892 under the authority of the U.S. Immigration Bureau. Fifteen-year-old Annie Moore was the first immigrant to be processed through Ellis, receiving a ten dollar gold piece from the immigration commissioner for the port of New York, John Weber, to commemorate the occasion. However, five years later, the new depot lay a smoldering heap of ashes. The pine buildings had burned to the ground. By 1900 the size of the island was substantially increased by landfill composed mostly of ships' ballast and earth excavated from New York City's subway system. The depot was replaced by sturdier, fireproof, more ornate red brick structures in Byzantine and French Renaissance style.

In the busiest period, between 1900 and 1915, as many as 5,000 people were processed daily on Ellis. Close to a million newcomers arrived annually in this period, 75 percent of them coming through Ellis. In 1907 alone, 1.2 million arrived in the United States, many seeking religious or political liberty but the vast majority in pursuit of economic opportunity. After the start of World War I in Europe, immigration to the United States declined precipitously and Ellis Island was quiet. After America's entry in the war, over 2,200 German sailors from ships detained in American ports were interned on Ellis Island. Wounded American soldiers were later taken to the hospital on Ellis for treatment.

After the war, Ellis again buzzed with the sounds of immigrants and inspectors. However, following the restrictive legislation of the 1920s, immigrants were inspected and interrogated abroad prior to receiving their visas. Now more individuals bid farewell to the United States from Ellis than entered it. The island became a detention center for deportees. Later it would again be used to treat wounded servicemen and as a Coast Guard Station. By 1954, it was closed and declared excess federal property. Almost forty years later, Ellis Island became a monument and museum celebrating the masses who came from abroad in search of better lives and in the process built a better America.

Who came through Ellis Island during its heyday as an immigration depot and what happened to them during their stay? First and second class ship passengers never set foot on Ellis Island. They were inspected and interrogated in the privacy of their ship cabins and landed in Manhattan. All others traveling third class or steerage were required to be processed on Ellis.

The first officials that immigrants encountered face-to-face on the island were federal physicians in search of newcomers with contagious diseases, mental abnormalities, or physical deformities that might limit newcomers' abilities to support themselves. Those whom inspectors wanted to examine further were detained and chalked with a code letter to indicate the reason for the holdover—"K" for hernia, "L" for lung, "E" for eye, "H" for heart, "X" for mental disorder.

After completing the medical examination, immigrants were assembled in the Great Hall. Immigration Bureau officers called newcomers' names from the manifests of the ships on which they arrived. The immigration officer verified names and asked numerous questions concerning marital status, occupation, nationality, final destination, and the sum of money that the immigrant carried. Those with insufficient funds or a relative to sustain them while they hunted for a job might be detained or even rejected.

Only one in six newcomers was detained on Ellis Island. One group that encountered special difficulty was young single women arriving unescorted. With few occupations open to women, officials feared that young women would either fall destitute and become wards of the state or, worse yet, suffer a moral fall and turn to prostitution. Therefore women were not permitted to leave the island unescorted. Others detained were those awaiting funds from relatives so they could support themselves and reach their final destinations. Copious dormitories housed those detained for medical, mental/emotional, financial, or other reasons while they awaited hearings before boards of review. Those denied entry by such boards had a final appeal to Washington.

Most newcomers spent only a few hours on Ellis Island before receiving cards stamped "admitted" and taking ferry passage to Manhattan or a barge to the railroad piers of New Jersey for the next leg of their journey. They could exchange their money for American currency and purchase train tickets before departing the island. Two-thirds of those admitted bought train tickets for places other than New York City. Although there were seventy other immigration depots in this era, 90 percent of all arrivals between 1892 and 1924 were processed on Ellis. Today, over 100 million Americans can trace their heritage through someone who was processed on Ellis Island.

The story of Ellis Island has often been romanticized in novels and the electronic media. Newcomers were either the helpless huddled masses herded hither and yon by indifferent or even sinister bureaucrats, or brave souls who withstood the efforts of those who would gouge them of their money, change their names on registry lists in a spirit of nativism or cruel humor, or worse yet, reject them at the gates for frivolous reasons.

The case files and records of investigations into Ellis Island procedures included on these reels of microfilm offer a multidimensional portrait of day-to-day doings at America's flagship immigration depot. There were periodic episodes of bribe-taking and other corrupt practices on Ellis revealed in investigations. However, when charges were lodged, Congress investigated. Most federal authorities on Ellis such as commissioners William Williams and Robert Watchorn strove to be vigilant, knowing Washington and other governments were keeping Ellis Island under close scrutiny. Those seeking to take advantage of the newcomers were usually caught and punished. Equal vigilance appears to have been

required of officials to see that immigrants desperate to enter the United States at all costs did not circumvent American laws and admissions procedures. What emerges in these fascinating documents, then, is a portrait of American officials, still new to the challenges of the administrative state, seeking to fairly and efficiently administer the immigration process, one of the most perennially controversial and critically important aspects of the American experience in the twentieth century.

Scope and Content Note

Collection Description. The Subject Correspondence File constitutes the Central File of the Commissioner General of Immigration in Washington, D.C., for the period between 1906 and 1932. The file is arranged by case file number, and the case files were begun in chronological order. However, the commissioner's office sometimes brought older files forward and assigned them new, higher numbers, resulting in occasional disruptions in the chronology. In general, the material on the microfilm runs chronologically from 1906 into the early 1930s. Because of the commissioner's need to bring forward earlier records, however, this edition contains significant materials dating back to 1899.

Among the most significant case files in this edition are the records of several investigations into allegations of corruption, brutality, and maladministration on Ellis Island. The earliest investigation is that against Immigration Commissioner Edward McSweeney between 1899 and 1902 (Reels 6 and 7). This was followed by another lengthy investigation conducted by Arthur von Briesen of the New York Legal Aid Society (Reels 7 and 8) in 1903 and a third by James Bronson Reynolds in 1906 (Reels 1 and 9). There are also records of a congressional investigation of Ellis Island between 1911 and 1913 (Reel 11). A final corruption investigation appears in 1922 (Reel 17). These investigations were frequently undertaken at the behest of complaints about maladministration made in the foreign-language press. In some cases, the investigations exhonerate the Immigration Service from charges of misdeeds. In other cases, corruption or maladministration is exposed. Regardless of the outcome, these investigations often provide richly detailed accounts about the daily administration of Ellis Island.

A second major category of records in this microfilm edition is the Force Files for Ellis Island. They provide comprehensive statistics on Ellis Island personnel. These records detail salaries, language requirements, need for force increases, and descriptions of job responsibilities for most of the period covered by the Subject Correspondence. In addition to the comprehensive Force Files, there are files on the establishment of the female Boarding Matrons positions beginning in 1903.

Immigration officials on Ellis Island were charged with administering increasingly restrictive immigration laws and regulations. Before World War I, they were required to inspect for health or mental disabilities, criminal backgrounds, anarchistic political inclinations, poverty (a likely cause of an immigrant's falling onto charity rolls), and intent to defy the ban against importation of contract laborers. Immigration officials were also compelled to exclude Chinese and most Asians.

During World War I, the Immigration Act of 1917 expanded excludable political subversives beyond the anarchist category to include persons who advocate the assassination of government officials or the destruction of private property. Also in 1917, a literacy test was added to the admission requirements—although it was speadily waived in the interest of admitting aliens as war production workers. In 1920, immigration exclusion was again broadened to bar persons belonging to any organization that advocated the destruction of private property or the assassination of public officials. The Immigration Act of 1921 imposed numerical quotas on different nationalities. Once the quota was met, no more members of that

nationality would be admitted that year. The 1921 national origins quotas limited the immigration of each nationality to 3 percent of that nationality's population in the 1910 census. In the Immigration Act of 1924, the national origins quotas were redefined to 2 percent of a specific nationality's population in the 1890 census—a formula that discriminated heavily in favor of northern Europeans to the near exclusion of other nationalities.

The most frequently contested exclusion in the pre—World War I years pertained to the exclusion of paupers likely to become "public charges" to the charity rolls. The determination of who might likely become a "public charge" was left to the station inspector, and at Ellis Island the inspector general defined those who possessed less than the equivalent of ten dollars (later increased to twenty-five dollars) as those likely to become public charges. Some of the controversy over the exclusion of "public charges" is apparent in the investigative reports mentioned above. Unfortunately, files pertaining to the exclusion of immigrants for political reasons were withdrawn from the National Archives by the Immigration and Naturalization Service in the 1960s and never returned. The exclusion of Asians is the focus of a previous edition of *Records of the Immigration and Naturalization Service, Series A, Part 1*. There is surprisingly little in the Subject Correspondence about the exclusion of suspected alien contract laborers, which reveals, perhaps, the extreme difficulty in administering that provision of the law (intended to prevent employers from importing laborers to supplant American citizens at lower wages). Difficulties in the administration of national origins quotas are apparent in some of the later files on the microfilm.

Medical examinations are well documented on this microfilm edition. Although medical (and mental) examinations were performed by the U.S. Marine Hospital Service (whose records constitute a separate record group at the National Archives), the Subject Correspondence File includes some comprehensive reports by the Hospital Service. These are supplemented by files on New York State agencies for the insane. The sweeping investigation made in 1906 by James B. Reynolds covers medical and mental examination procedures. A lengthy case carried by the Immigration Service against the Holland-American Steamship Line concerns medical responsibilities of transatlantic steamship companies.

A small amount of material in this edition concerns the exclusion of prostitutes. Major files on this subject are forthcoming in a separate microfilm edition.

Several files pertain to investigation of fraud practiced upon immigrants by private contractors outside the Immigration Service on Ellis Island. Some of these criminals were contractors with Ellis Island (such as Baggage Agent Bernard Biglin) or concessionaires privileged to locate an outlet on the island (such as Ticket and Steamship Agent Frank Zotti). There is a file on a disbarment proceeding against an immigration attorney to prevent his further practice before the Boards of Special Inquiry at Ellis Island. More legitimate private interests are represented in files under the Hebrew Immigrant Aid Society and the American Federation of Labor.

Files for the years after World War I are not as full as those for previous years. There are files on detaining enemy aliens during World War I, and some files documenting the administration of national origins quotas and the inspection of second-class (as distinguished from third-class and steerage) passengers.

Researchers should note that the National Archives holds a large series of original letterpress volumes containing every communication written on any level at Ellis Island for the period between 1903 and 1912. This series, Letters Sent from District 2, 1903–1912, spans 339 large letterpress volumes that typically exceed one thousand pages each. The condition of the originals and the large size of the series make it impossible to microfilm these records with this edition. They are open to researchers at the National Archives.

Note on Sources

This edition is drawn from the Subject Correspondence (1906–1933) series of Record Group 85, Records of the Immigration and Naturalization Service held by the National Archives, Washington, D.C.

EDITORIAL **N**OTE

The selection was made after a comprehensive survey of the entire Subject Correspondence, during which every file pertaining to the administration of Ellis Island was noted. All of these have been filmed in their entirety and are reproduced on this microfilm with the exception of files pertaining solely to contracts for building and supplies. These can be examined in the original at the National Archives.

REEL INDEX

The following is a sequential listing of Bureau of Immigration casefiles that pertain to the administration and activities of the Immigration Station on Ellis Island, New York Harbor. In the interest of accessing material in these files, this index denotes significant issues, places, events, policies, organizations, and individuals. The four-digit number on the far left is the frame number at which a particular file begins. The file title in brackets highlights the general subject of the folder and was gleaned from the Immigration Service's Subject Correspondence Finding Aid. The bracketed titles are followed by the casefile number, the inclusive dates of documents within the file, and the total number of pages. To further assist the researcher in accessing material in the files information has been added in parenthesis. Lists of additional topics have been provided under the heading *Subjects*.

The initialisms H.R. (H. Res.) and A.F. of L. are used throughout this guide. H.R. (H. Res.) is the initialism for House Resolution; A.F. of L. for American Federation of Labor.

[February 1909.] 5pp. Subject: Status of ticket sales/brokerage application. 0985 [In re Frank Zotti & Company] Casefile 51658/19C. [January, August 1908.] 12pp.

Reel 2

[Investigation of Alien Escapees, 1908] Casefile 51774/90. [May–August, October–December 1908; February 1909.] 139pp.
Subjects: Investigation of watchmen; Joseph W. Stitt criminal case; interrogations of escapees, watchmen, and inspectors.

Dismissal of George Welch] Casefile 51777/47-A. [April, May 1908; July, August 1909.] 34pp.

Subjects: Dereliction of duty investigation; investigation of alien escapees.

Subject: Narodni List advertisement and violation of U.S. immigration law.

1908.] 42pp. **[Report of Conference Held at Ellis Island, June 15, 1908] Casefile 51831/101.** [June 1908.] 42pp.

Subjects: Hospital cases; trachoma issue; U.S. Marine Hospital Service; medical treatment of detained aliens.

0216 [U.S. v. Holland-America Line—Hospitalization and Maintenance of Aliens, 1913] Casefile 51831/148 [Folder 1 of 2]. [January, May 1913.] 43pp.

Subject: Facts of the case before the District Court of the United States, Southern District of New York.

[U.S. v. Holland-America Line—Hospitalization and Maintenance of Aliens, 1913] Casefile 51831/148 [Folder 2 of 2]. [Undated.] 71pp.

Subject: Briefs of United States and Holland-America Line before the United States Circuit Court of Appeals for the Second Circuit.

0330 [U.S. v. Holland-America Line—Hospitalization and Maintenance of Aliens, 1913] Casefile 51831/148, Part I [Folder 1 of 2]. [March—July, September 1909.] 43pp.

Subjects: Charges to Cunard Line for hospitalization of alien passengers; Toth family case.

[U.S. v. Holland-America Line—Hospitalization and Maintenance of Aliens, 1913]
 Casefile 51831/148, Part I [Folder 2 of 2]. [December 1904; August 1908; January, February 1909.] 71pp.

Subjects: Protest by Cunard Line regarding hospitalization charges for alien passengers; Toth family case; American Line–Red Star Line case.

[Ship Companies' Protest against Paying Hospitalization and Maintenance of Sick Aliens, 1913] Casefile 51831/148-A. [September–November 1909.] 74pp.

Subjects: Steamship lines' protest of liability for hospital expenses for aliens; Toth family case opinions; New York City hospitals' situation; medical treatment of aliens and admissions issue.

[Ship Companies' Protest against Paying Hospitalization and Maintenance of Sick Aliens, 1913] Casefile 51831/148-B. [December 1909–February 1910.] 72pp.

Subjects: Medical inspection of second cabin aliens after dark; North German Lloyd Company case; attitude of steamship lines; "medical examination on board ship" decision.

[Ship Companies' Protest against Paying Hospitalization and Maintenance of Sick Aliens, 1913] Casefile 51831/148-C. [March 1909; February, March, November, December 1910; February 1911.] 119pp.

Subjects: New York City hospitals' situation; *U.S. v. Holland-America Line;* Cunard Line case; federal government reimbursement of New York City hospitals.

0709 [Court Documents relating to U.S. v. Holland-America Line, 1913] Casefile 51831/148-E. [April–June 1913.] 171pp.

Subjects: Facts of the case before the District Court of the United States, Southern District of New York; decision of district court; brief for defendant and of plaintiff before the District Court of the United States, Southern District of New York; "Statutory Provisions in relation to Inspection and Examination of Immigrants."

Reel 3

[Protests over Hospital Bills by Shipping Companies, 1913] Casefile 51831/148-F [Folder 1 of 2]. [Undated.] 226pp. [121frs.]

Subjects: Brief of the United States before the United States Court of Appeals for the Second Circuit; transcript of record before the United States Court of Appeals for the Second Circuit.

0122 [Protests over Hospital Bills by Shipping Companies, 1913] Casefile 51831/148-F [Folder 2 of 2]. [June 1913–January 1914.] 121pp.

Subjects: Steamship ticket agents; misrouting of deportees bound for westbound transcontinental deportation.

- **[Ellis Island Force File, 1927–1929] Casefile 55630/4.** [July 1927–August 1929.] 204pp. *Subjects:* Appointments and promotions; Immigration Service's adverse policy of promoting those from lower grades; personnel lists; labor union complaints; morale problems.
- **[Ellis Island Force File, 1929–1933] Casefile 55630/4-A.** [September 1929–September 1933.] 254pp.

Subjects: Staff transfers; inadequate inspection staff; labor union complaints; ferryboat and power plant staff problems; requests for salary revisions; need for interpreters; appointments.

Subject Index

The following index is a guide to the major topics, personalities, activities, and programs in this microform publication. Selected individual report titles have been indexed due to their importance and content. The first number after each entry or subentry refers to the reel, while the four-digit number following the colon refers to the frame number at which a particular file folder containing information on the subject begins. Hence, 1: 0349 directs the researcher to the folder that begins at Frame 0349 of Reel 1. By referring to the Reel Index, which constitutes the initial segment of this guide, the researcher will find the folder title, case file number, inclusive dates, and a list of additional subjects, arranged in the order in which they appear on the film. Names of cities have been indexed separately from their state designation.
