

# LexisNexis® for Energy and Utilities Practice

Stay at the forefront with essential content and solutions to help you achieve better outcomes.

We're there every step of the way to help you practice with confidence.

---

## Research and analyze regulations and legislation

*Find the regulatory information you need to stay compliant and counsel with confidence.*

LexisNexis has one of the largest collections of regulatory materials from federal and state regulators, including **FERC decisions** and an **exclusive offering of online Public Utility Reports**.

*Evaluate and influence pending bills and legislation at both the federal and state levels.*

**State Net**® resources provide customizable information to track, assess and share legislative and regulatory intelligence.

*Compare and understand potential compliance issues created by varied treatments of legal provisions across states.*

**LexisNexis**® **50 State Surveys of Statutes and Regulations** compares state laws on particular topics, with links to statutes and regulations.

---

## Conduct due diligence

*Streamline the due diligence process.*

**Lexis Diligence**™ helps you more thoroughly vet third parties and analyze business opportunities—so you can mitigate compliance, reputation or sanction risks.

*Get information on new or ongoing litigation that may impact your clients.*

**CourtLink**®, a leading online docket and diligence tool, helps you identify prior and pending litigation involving issues and parties of interest.

*Protect yourself and your clients with superior due diligence information.*

**LexisNexis**® **Public Records** provides over 37 billion records, including assets and holdings of companies and individuals.

---

---

## Advise and conduct transactions

*Save time drafting and negotiating energy and utilities transactions and deal documents.*

LexisNexis provides a comprehensive collection of **Matthew Bender® analytical titles** covering energy and utilities transactions that offer helpful checklists and forms.

---

*Get analysis related to key accountabilities present in energy and utilities transactions.*

**Energy Law and Transactions** provides an authoritative perspective on all aspects of energy and utilities transactions.

---

*Advise your clients with confidence knowing you have real-world information to help counsel, research, draft and negotiate transactions.*

The **Lexis Practice Advisor®** service provides valuable guidance to help you manage and execute legal transactions.

---

## Counsel and manage litigation

*Discern the most current state of the law.*

**Lexis Advance®** provides access to key treatises and practice guides related to the most relevant issues in corporate and government litigation, including those related to energy.

---

*Get timely and essential information to help shape your litigation strategy.*

**CourtLink** provides timely alerts to help you monitor filings and documents from cases of interest.

---

*Manage the workflow, costs and outcomes of big data.*

**LexisNexis** offers a powerful and integrated software suite that helps you take control of the entire litigation process.

---

## Discover and monitor legal and market developments

*Don't miss market or regulatory events that may impact you or your clients.*

**LexisNexis** has an extensive collection of news that features over 26,000 sources, from breaking news to analysis.

---

*Get the earliest possible indication of critical legal developments that could impact your practice.*

The **Law360®** service is fast to market with breaking news and analysis.

---

*Tap into resources that help you understand current legal thinking on issues important to the industry.*

**Mealey's™ Fracking Report** and the **LexisNexis Oil and Gas Reporter** provide in-depth news and analysis of key events and litigation related to hydraulic fracturing and oil and gas law; and **Platts' Inside FERC** offers specialized reporting on FERC activities and issues.
