LexisNexis® CaseMap®
Overview Literature

A CONNECTED LITIGATION STRATEGY IS A SNAP

ORGANIZE, AUTOMATE, ANALYZE AND
CONNECT WITH LEXISNEXIS® CASEMAP®

Throughout litigation, strategic insights can be lost when case information becomes disconnected. Litigators are skilled at keeping a myriad of facts in their heads; but at some point, the sheer volume of information can compromise effectiveness and efficiency.

LexisNexis® CaseMap® case analysis software is essential for managing facts, documents, persons, evidence, issues, and legal and investigative research from intake through settlement or trial.

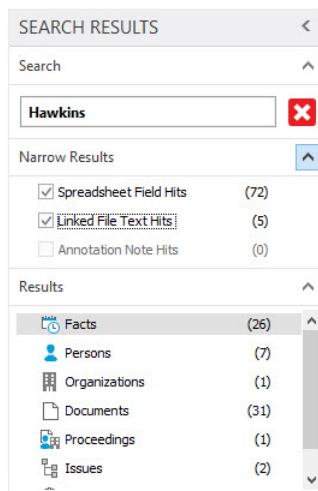

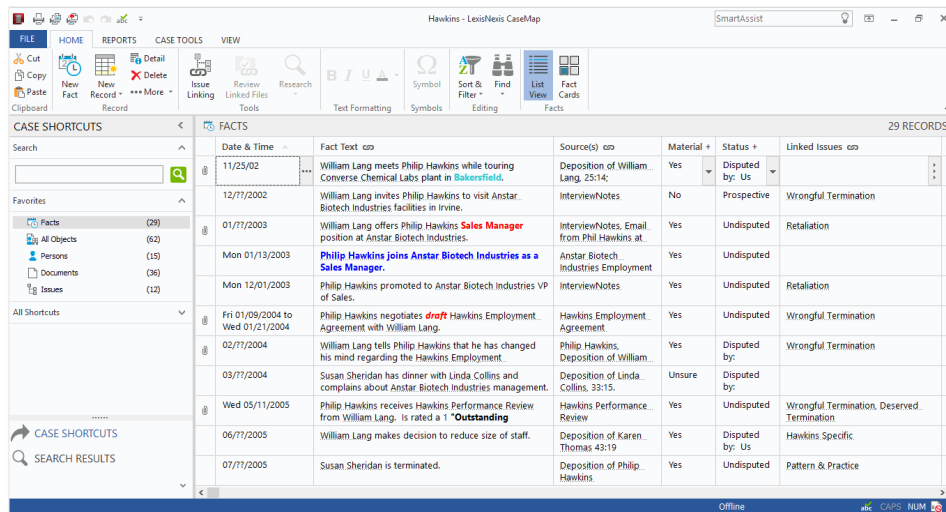

CaseMap® software is a good home for all your case information

Make the best use of key information from day one of a case. CaseMap simplifies organization of your litigation evidence with an easy-to-use, modern interface.

- Gather information from PDFs, Microsoft® Outlook®, Microsoft Word, Lexis Advance® and more while maintaining a record and the ability to link back.
- Organize your witness lists, master-fact chronology and document indices, plus privilege logs, deposition summaries and case issues you're trying to prove with customizable spreadsheets.
- See the connections you might otherwise miss by tying together the facts, issues, people and evidence.

Modern interface displays favorite features and makes it easy to organize case information

The ribbon at the top of your screen is similar to the design in other familiar software.

Easily search individual spreadsheets or search the entire CaseMap file as well as attached documents to quickly find and easily manage facts, key players and hot documents.

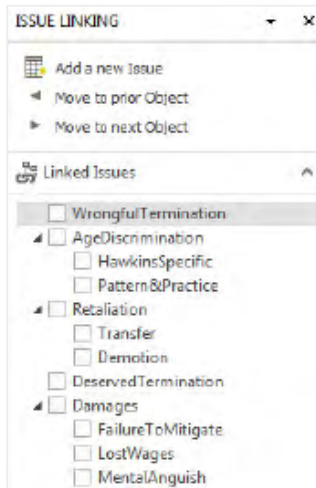

A guided approach makes it easier to navigate for novices and veteran alike

CaseMap® Smart Assist helps users accomplish tasks, search case data and bridge gaps to find the things you're looking for. Type in keywords in the search textbox and get results based on functional areas displayed in terms of relevancy of search.

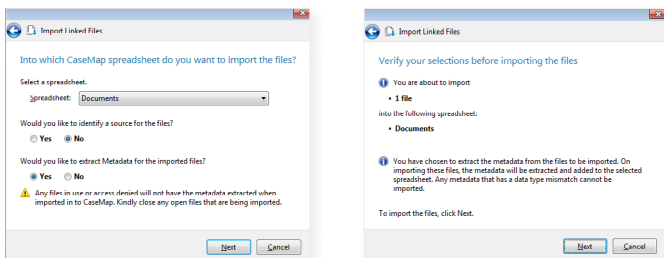

CaseMap Smart Assist integration

Automation and integration minimize wasted time

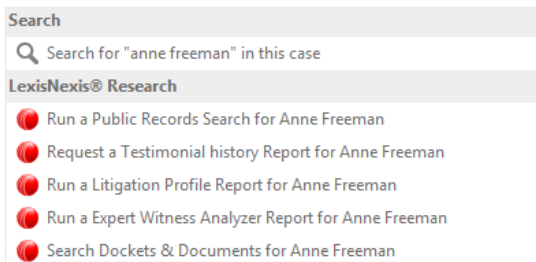

Easily link facts and objects to case issues with the Issue Linking tab.

- **Search for links** to objects and issues with names that match your search criteria with Search Link Assistant.
- **Automatically identify persons**, places and organizations when creating facts. Object recognition in CaseMap adds value and removes manual entry time and errors.
- **Bulk import multiple types of documents and images at once**—virtually any document type. Convert images to text using optical character recognition (OCR) on multiple documents to find the underlying text contained in images.
- **Import document metadata** into fields in your case, eliminating manual entry and costly mistakes. Capture metadata for review while you're improving the process.

- **Eliminate extra steps** by running Lexis Advance® searches right from CaseMap Smart Assist for greater insight and fact finding for your cases.

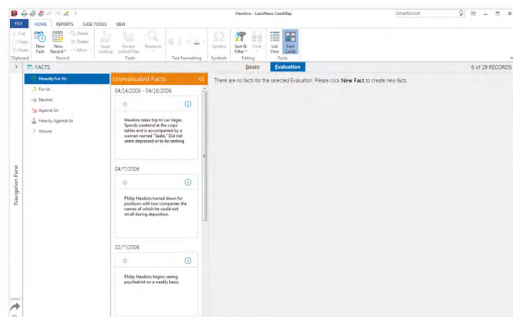

CaseMap Smart Assist integration

- Seamlessly send work product, case data and emails to CaseMap software from Microsoft software and other tools. Either highlight specific facts to send, or send the full document.

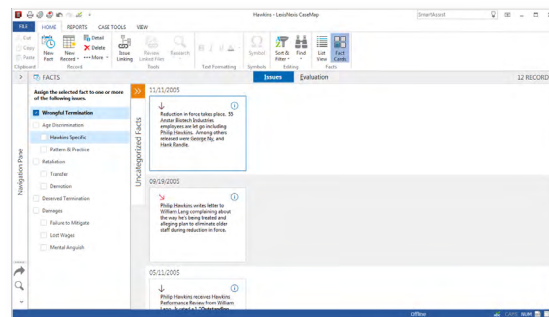

Get strategic insights from visualization and reporting tools

See the facts in your case and analyze how your case is developing with the unique and illuminating **Fact Card** view. This view organizes all the facts as they stack up in favor or against your case.

Fact Card uncategorized

Fact Card evaluated

A variety of convenient reporting options quickly pull together the information needed for different situations, including:

- By issue
- Summary judgment
- CaseMap® ReportBooks®

... and more.

In the course of organizing your case, you can add files to specific fields in your object spreadsheets. Then you can easily embed those linked documents in CaseMap® ReportBooks PDFs for easier fact tracking, information sharing and case analysis.

Date & Time	Fact Text	Source(s)	Material	Linked Issues	Evaluation
11/25/02	William Lang meets Philip Hawkins while touring Converse Chemical Labs plant in Bakersfield.	Deposition of William Lang, 25:14;	Yes

Having key files embedded in ReportBooks gives quick access to related references in the report, making it easier to prepare thoroughly for arbitration and trial.

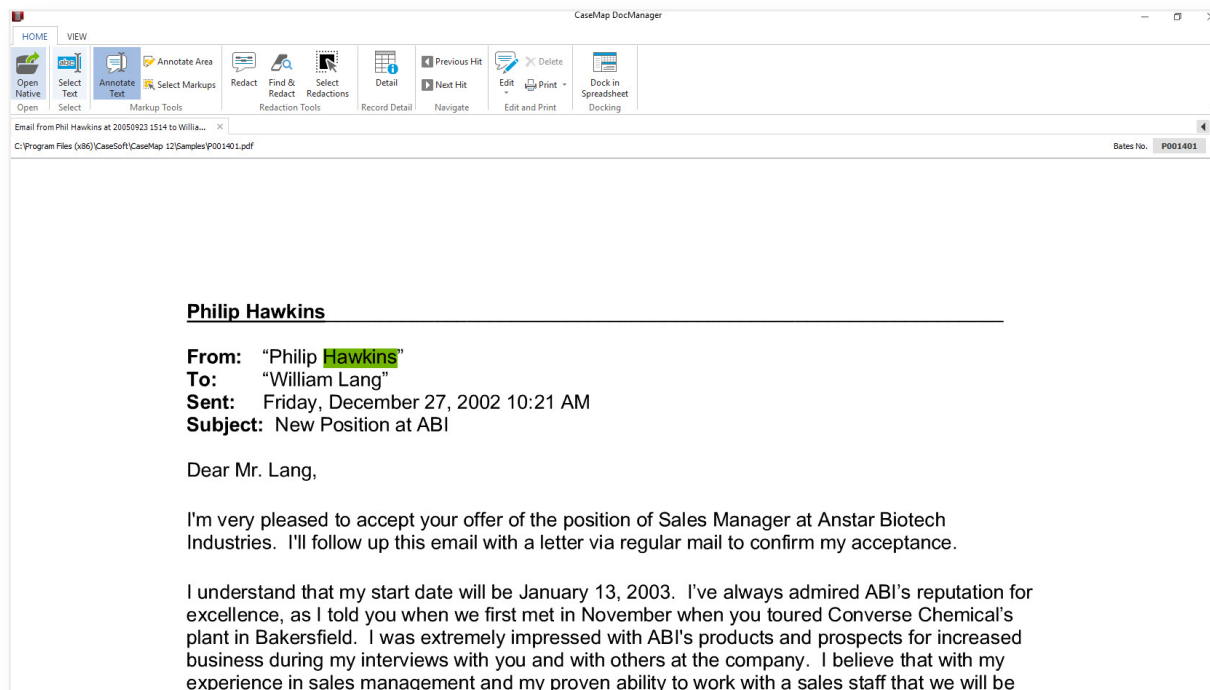

Connect with colleagues and clients in real time

A Microsoft® SharePoint® web part enables users to view real-time CaseMap data (e.g., spreadsheets) on a collaborative case team or matter web page.

Administrative users can grant access to the page for non CaseMap users (e.g., clients or co-counsel). The SharePoint web part requires SQL Server® access.*

CaseMap® DocManager provides advanced searching, viewing, annotating and printing

With a near-native viewer supporting most standard file types used in litigation, the CaseMap® DocManager feature provides a single interface for you to view, annotate, highlight, Bates stamp, batch print and batch convert files to PDF and TIFF.

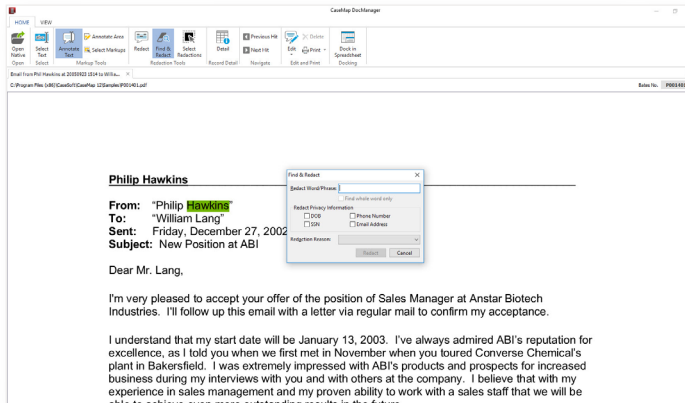

The CaseMap DocManager feature displays highlighted search hits.

CaseMap DocManager offers a document review pane, allowing easy navigation between search hit documents and keeping multiple documents open in the same window. Clicking on a different document in CaseMap (e.g., a document from the facts spreadsheet) opens in a separate tab so you can easily toggle between open tabs.

With DocManager, you can:

- Redact sensitive information within a document by selecting the text, or by using Find & Redact
- Easily create production sets from case documents
- Quickly find the information you need with hit-highlight capability

Improve productivity with Find & Redact.

“

... the break in that evidence connection turned up through organizing the data in CaseMap.

”

— SEAN O'BRIEN, PROFESSOR OF LAW, SCHOOL OF LAW, UNIVERSITY OF MISSOURI-KANSAS CITY, who led a legal team to exonerate an innocent man who had served 15 years in jail.

It all works together

Integration between CaseMap®, TextMap®, TimeMap® and Sanction® software makes all case information easily accessible and immensely useful.
