Streamlined Company Research

Say "goodbye" to fragmented searches and "hello" to a unified research experience that puts company and financial data at your fingertips.

Company Search lets you find specific businesses or discover new ones using filters to surface companies based on industry, number of employees, revenue, location and more.

Single-screen access to a vast data pool of company information

Editable search filters to meet your specific research needs

Customizable results display that surfaces key search data

Actionable Insights in Fewer Clicks

When you've discovered a company you want to learn more about, Nexis+ Al aggregates its diverse corporate data into an accessible Company Profile.

The Overview tab is your snapshot of key company information, including leadership, revenue, news coverage trends, article links, top competitors, and more.

The News tab highlights recent media coverage, allowing you to quickly see what's being said about companies of interest. Experience even more time savings by using Al Insights to summarize an article's key points.

Because each tab features links to original sources, you can validate your findings and see the context of company data for greater insight.

Powerful and Efficient Document Analysis

Instead of manually reviewing lengthy documents like 10Ks and annual reports to find the nuggets of information you need, you can use the Nexis+ AI Document Analyzer to extract relevant insights.

Simply upload a document of interest, and leverage new discovery opportunities:

Ę

AI Chat

offers prompts for common questions, or you can ask your own questions about the uploaded document's contents based on the needs or interests of stakeholders across your enterprise. The chatbot then generates answers based on the contents of the source document, along with citations.

Extractions

surface key data, like companies, geographies and people mentioned in the document with links back to related Company Profiles in Nexis+ AI, allowing you to view data on your target company's peers and competitors with just a click.

The Document Analyzer includes automatic citations within the summary, giving you transparency of results. Important details, including links, can be saved and organized in the Nexis[®] Hub Chrome Extension for future use.

Seamless First Draft Generation

Nexis+ AI empowers users to transform collected snippets of insightful company research into digestible reports with only a couple clicks.

Collect & Draft using Nexis+ AI. Save insights you find throughout your company research in one easy-to-organize location. Highlight and save text from news articles, along with the article's source data, to a Nexis+ AI collection.

Generate Draft then transforms your collected snippets of diverse insights into a written, cohesive report generated with AI.

Custom Outlines allow you to tailor your generated first draft to your audience by prioritizing the sources and snippets you select. Generated drafts are based on the contents of the source snippets.

Quickly review and edit your generated draft by cutting and pasting into your preferred text editor — along with linked citations to the sources your generated first draft was created with.

Transparency to Build Trust in Results

To help ensure the integrity and reliability of your company research, Nexis+ AI makes it easy to understand and validate where your company data and AI insights are sourced from:

Transparent data-sourcing

Enables greater confidence in research results from having full visibility into the origin of company data discovered in Nexis+ AI.

Publisher-friendly approach

Ensures data contributors receive equitable compensation, creating a collaborative ecosystem of knowledge sharing.

Closed-loop Al Reduces opportunities for hallucinations from Al-generated content because data is sourced exclusively from the documents you select or upload.

[2]

User Confidentiality

Data is anonymized so that it can never be traced to you by LexisNexis. All uploaded documents are immediately deleted after your session ends.

As part of the RELX family, LexisNexis adheres to ethical data use principles and compliance with privacy best practices, helping you overcome AI trust hurdles among decision-makers.

Experience the Future of Company Research

Embrace the future of company research with Nexis+ AI and unlock faster insight to stay ahead in today's competitive landscape.

Propel your company research forward with efficiency and transparency.

Create reports with links to original sources from an expansive content library.

Empower informed decisionmaking with insights rooted in data-driven intelligence.

Schedule a demo today to discover how Nexis+ AI can transform your decision intelligence.
